Connected System Design Project (EGE205)

Briefing and discussion before we start the project…

Introduction

- *Watch the following video… Please take note of the following:*
  - *City In Nature*
  - *Sustainable Living*
  - *Energy*
  - *Green Economy*
  - *Resilient Future*

SG Green Plan

(2024 update) Singapore Green Plan 2030

Ministerial Video SG 2030

The Driving Question for the Project

*How can we **develop** a **connected system** for a **green**, **liveable** and **sustainable** environment for a better future?*

* What is a “Driving Question”?
- A kind of question that can drive us, haunt us, and move us to search for answers.

Introducing The Driving Question

- A connected system consists of the following parts interacting with one another to achieve a common purpose.
  - Sensors and/or actuators
  - Network
  - Process and people
- *Possible areas to source for ideas.*
  - *Smart home*
  - *Healthcare*
  - *City in Nature*
  - *Energy Systems*
  - *Transportation*
  - *Automotive*
  - *Autonomous Systems*

Group Project (by Week 16 and 17)

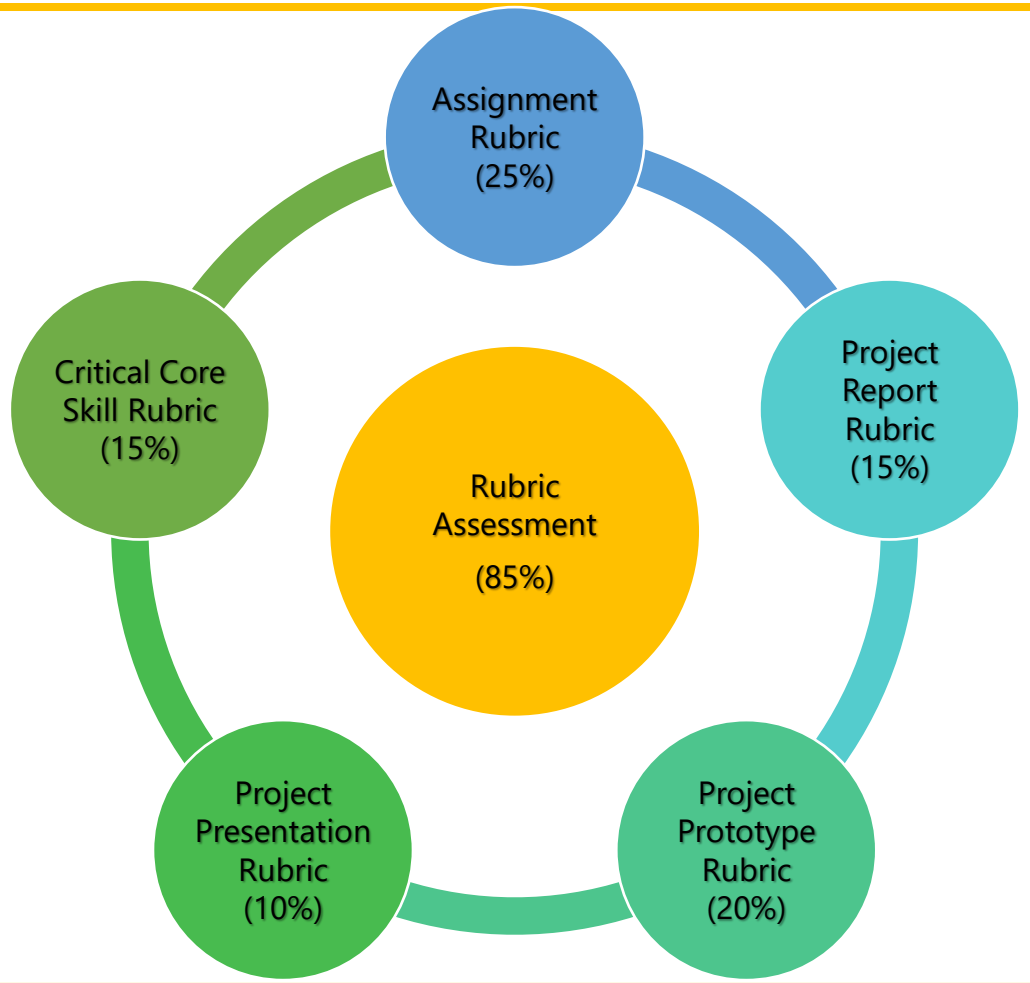
Project Report (Group)

Project Prototype

Project Presentation

Rubrics

- **Rubric** is a **scoring guide** used to evaluate the quality of the assignment, report and project submitted.
- Rubrics usually contain **evaluative criteria**, **quality definitions for those criteria at particular levels of achievement**, and a **scoring strategy.**
- It is aimed to provide **accurate and fair assessment** and **fostering understanding.**



Team Forming

- Each team should have **at least 4 members if not 5**. For example, a group of 23 learners should be divided into 3 teams of 5 members and 2 teams of 4 members. Odd number is preferred in order to better facilitate decision making within the team.

- **Team allocation will be done** based on the criteria which include academic result, gender, related module skills.

- However, you can **submit a request here** on who do you want to be with in a team before the next lesson. We will try our best to grant your request.

Team Forming

- **Two online form submission is required for a request to be considered.** For example, learner A wants to be in the same team as learner B. Both learners A and B needs to submit the online form respectively.

- No **double request** will be accepted for consideration.

- All request will be considered based on **latest submission**.

Tips To Work In A Team

- **BE PROACTIVE**
  - By taking the first step to get to know your team members.
- **BE INCLUSIVE**
  - By considering individual's strength rather than weaknesses of your team members and give each other a learning opportunity.
- **BE OPEN**
  - By welcoming new challenges and listening to new suggestions from your team members.
